

LMS (Learning Management System) Overview

Our Learning Management System is a complete academic platform designed to streamline user access, content delivery, assessments, and performance tracking. It supports students, instructors, and administrators with role-based access and feature-rich modules to manage the full academic lifecycle.

Authentication Module

- Secure login system for ERP staff, students, and instructors
 - JWT-based authentication for secure student sessions
 - Role-based dashboard routing (Admin, Instructor, Student)
-

User Management

- Create, edit, or deactivate student and staff accounts
 - Assign or reassign courses and semesters to users
 - Define and manage roles: Admin, Student, Instructor
 - Control access based on status (active, blocked, pending)
 - Enable/disable semester access based on fee status
 - View student academic progress and submissions
 - Track fee verification to control access
 - Search students/instructors by name, ID, or email
-

Course Management

- Add, edit, or remove courses easily
 - Upload course material (videos, PDFs, MCQs)
 - Assign instructors to relevant subjects
 - Link courses to batches and semesters for structured delivery
-

Learning Content (Courseware)

- Students can view uploaded course materials anytime
 - Track lesson completion and progress
 - Include simulated real-world case studies
 - Enable gamified MCQ quizzes to boost engagement
-

Assignment Module

- Instructors upload assignments with instructions
 - Students submit responses with attachments
 - Instructors evaluate and provide grades
 - Add personalized feedback per student submission
-

Live Class Integration

- Schedule live sessions by date, time, and topic
- Share Google Meet or Zoom links
- Show sessions in a student-friendly calendar view

Assessment & Exams

- Create MCQ and written exams with timers
- Support for auto-grading or manual evaluation
- Generate score reports for each exam

Payment Verification

- Admin manually verifies student fee payments
- Show access block notices and "Pay Now" popup for unpaid users

Attendance Management

- Auto-track attendance based on student logins
- View attendance history per course or batch

Notifications

- Push alerts for assignments, exams, and live classes
- Notify students of restricted access or deadlines

Reports & Dashboards

- View student progress reports and performance trends

- Get assignment and exam summaries
 - Track live class attendance
 - Monitor fee status dashboards
 - View user activity logs (logins, actions, etc.)
-

Question Bank Development

- Create and organize reusable questions
 - Link questions to topics, subjects, or exams
 - Build a smart question library for assessments
-

Supported User Roles

- **Student:** Access content, assignments, live classes, and exams
 - **Staff (Instructor):** Upload content, manage students, evaluate work
 - **Admin:** Manage all modules, users, and reports
 - *(Optional future roles: Parent, Accountant, Director)*
-

Project Highlights

- Full academic lifecycle in one platform
- Role-based dashboards and access
- Secure authentication with JWT

- Structured learning with content + assignments
- Exam module with grading and reporting
- Live class scheduling and attendance
- Fee-based access control
- Modern UI built with **Ionic React + .NET Core + SQL Server**
- Scalable, responsive, and mobile-friendly
